

Thomas Kasbauer,
(EV Group, Austria)

Thomas Kasbauer is a Senior Process Technology Engineer at EV Group, currently based in South Korea. He specializes in the development of advanced fusion and hybrid bonding technologies, contributing to cutting-edge innovations in semiconductor manufacturing. Prior to his assignment in South Korea, Thomas was part of the Process Development Team at EV Group Headquarters in Austria, where he played a key role in pioneering process solutions.

He holds a Master's degree in Engineering from the University of Applied Sciences Upper Austria in Linz, reflecting a strong academic foundation in applied technologies and process engineering.
